## MANAGEMENT DISCUSSION & ANALYSIS

### OVERVIEW

India continues to witness a very challenging economic environment. Growth remained weak and continued to decline throughout 2012-13 (FY2013): 5.5% in Q1, 5.3% in Q2, followed by 4.5% in Q3, the last being the lowest quarterly growth in a decade. For FY2014, growth is expected to be in the neighborhood of 5% - much below the 6.2% recorded for FY 2012

Your Company being a Non-banking Finance Company (NBFC) is engaged in the business of finance and investment. NBFC, today are facing severe competition from banks i.e. nationalized and established banks, corporate banks and cooperative banks. This is in contrast to the Banks working where NBFCs business model is characterized by very close customer interaction and relationship, a deep understanding of customer needs. NBFCs have contributed significantly towards the steady increase in the credit penetration levels. Overall, credit penetration levels in India still remains low as compared to the developed countries despite the rapid credit growth in recent past. Thus financial intermediaries like NBFC's are presented with big opportunities not only to meet the rapidly growing credit needs of main stream borrowers but also to address the huge untapped demand of borrowers dependent largely on informal channels. This is where our efforts in providing the fund-based activities to our customers will play a meaningful long term role.

### INDUSTRIAL STRUCTURE AND DEVELOPMENT

Non-Banking Finance Companies (NBFCs) have become an integral part of the country's financial system because of their complementary as well as competitive role. In recent times, NBFCs have emerged as lenders to both companies and individuals. When it comes to lending, NBFCs are generally regarded to be complementary to banks and are often able to offer better services and products to their customers.

The global economy in FY 2012-13 improved slowly but did not recover to the extent anticipated in the beginning of the year. Several European economies experienced recession due to high unemployment, banking fragility, fiscal tightening and sluggish growth. The U.S. economy improved marginally, driven mainly by housing and the consumer sectors; however, capital investments remained sluggish. Among the Asian economies, China, going through a political transition, experienced considerably slower growth. Deceleration in industrial output and exports weakened India's economic growth significantly. The weak macro environment and slower growth caused the margin environment to remain volatile with downward bias.

The most pressing task for the government will be to get the investment cycle buoyant again. Higher public investment appears unlikely given the tight fiscal situation due to the uncontrolled revenue spending which has led to uncontrollable inflation. Private investment activity has been slack due to numerous uncertainties facing corporate. The large Indian companies are sitting on a pile of cash which they are refraining to use to build fresh capacity. The obvious way would be to rebuild corporate confidence, and that can be achieved only

through the implementation of a well-studied actionable agenda. The few sectors that have a significant multiplier effect on the rest of the economy could be given special attention. These include construction of new roads, a construction of affordable housing for the masses, energy etc. which will generate jobs as well as demand for cement, steel and engineering equipment among others. The fiscal deficit is also a concern area and it seems highly unlikely that there will be significant progress towards fiscal discipline right now.

### **OPPORTUNITY & THREATS**

India is an attractive investment destination and the Companies here are the part of India's growth story and through this we have also get hold of immense opportunities to expand, strengthen and enhance our business. We have enough headroom available to enlarge our network and at the same time educate number of customers to tie-up with us.

However due to continuing recession throughout world markets, a slowdown in financial flows into the economy and lingering impact of global credit crunch are seen as the greatest risk faced by NBFCs. Further the volatility in the Indian equity markets and the huge liquidity crunch due to global financial meltdown would be a threat for the Company's business growth.

### **RISK AND CONCERNS**

The Company's risk philosophy involves the developing and maintaining a healthy portfolio within its risk appetite and the regulatory framework. While the Company is exposed to various types of risk, the most important among them are credit risk, market risk (which includes liquidity risk and price risk) and operational risk. The measurement, monitoring and management of risk remains key focus areas for the Company which manages this risk by maintaining prudent and commercial business practices.

### **INTERNAL CONTROL SYSTEM**

Company has adequate internal control system commensurate with its size and nature of business.

Conforming to the requirements of the regulatory authorities such as the RBI and the SEBI and consistent with the requirements of the Listing agreements with the Stock Exchanges, the company has institutionalized an elaborate system of control processes designed to provide a high degree of assurance regarding the effectiveness and efficiency of operations, the adequacy of safeguards for assets, reliability of financial controls and compliance with applicable laws and regulations. The Internal Auditors are mandated to carry out periodical audit and report on areas of noncompliances/ weaknesses. Corrective actions in case of reported deficiencies, if any, are taken actively to further strengthen the internal control systems. These reports are reviewed by the Audit Committee of the Board of Directors for follow-up action, and instructions are issued for taking necessary measures.

**OUTLOOK**

The Company's present business operations are preponderantly that of Loans & Advances, future of which largely depends upon financial and capital markets. The income from the advances/lending business is steadily growing, contributing significant volume to the overall business of the Company. The Management is optimistic, expects to maintain its performance in FY2014 and hopes to grow at a rate faster than the growth of bank credit. The approach would be to continue the growth momentum while balancing risk. As before, it will continue to invest in strengthening risk management practices; and in maintaining its investment in technology and human resources to consolidate its position as a leading NBFC in India.

**OPERATIONS AND FINANCIAL PERFORMANCE**

During the year under review, the interest income from loans granted was Rs.59.80 Lacs as against Rs.46.50 lacs for the previous year. The substantial increase in revenues is on account of higher realization of Trade Receivables / earnings of interest on finances made by it. The operations of the Company have resulted in Profit After Tax of Rs 12.93 Lacs as against Rs. 13.85 lacs in the previous year, which is on account of the higher employee benefit expenses and other expenses.

**HUMAN RESOURCES**
